

Write the fractions below using decimal notation and then mark them on the number line. The first one is done for you.

$$\frac{6}{10} = \underline{0.6}$$

$$\frac{4}{10} = \underline{\quad}$$

$$\frac{9}{10} = \underline{\quad}$$

$$\frac{1}{10} = \underline{\quad}$$

$$\frac{5}{10} = \underline{\quad}$$

Write the fractions below using decimal notation and then mark them on the number line. The first one is done for you.

$$\frac{38}{100} = \underline{0.38}$$

$$\frac{17}{100} = \underline{\hspace{2cm}}$$

$$\frac{44}{100} = \underline{\hspace{2cm}}$$

$$\frac{58}{100} = \underline{\hspace{2cm}}$$

$$\frac{93}{100} = \underline{\hspace{2cm}}$$

Write the fractions below using decimal notation and then mark them on the number line.

$$\frac{12}{100} = \underline{\hspace{2cm}}$$

$$\frac{2}{10} = \underline{\hspace{2cm}}$$

$$\frac{20}{100} = \underline{\hspace{2cm}}$$

$$\frac{9}{10} = \underline{\hspace{2cm}}$$

$$\frac{86}{100} = \underline{\hspace{2cm}}$$
