

## COMO EVALUAR UNA EXPRESION ALGEBRAICA

### Algebraic Expression

$2x$  : expression

$2x + y$  : binomial

$2x = 14$  : equation

Example

$$9x - 2 = 16$$

↙ variable

Evaluate :

$$2x \text{ when } x=2$$

$$= 2(2)$$

$$= 4$$

Substitute value

$$5x - 10 \text{ when } x=8$$

Solution:

$$= 5(8) - 10$$

Complete Calculation

$$5x - 10 \text{ when } x=8$$

Solution:

$$= 5(8) - 10$$

$$= 40 - 10$$

$$= 30$$
