

Find the value of x.

13.

Four green rectangles, each containing a plus sign (+), are stacked vertically. To the right of these is an equals sign (=), followed by eight red rectangles, each containing a minus sign (-), arranged in two rows of four.

Find the value of x.

14.

A single green rectangle with a plus sign (+) is at the top. Below it are ten yellow squares, each with a plus sign (+), arranged in three rows: two rows of three and one row of two. To the right of this is an equals sign (=), followed by four yellow squares, each with a plus sign (+), stacked vertically.

Find the value of x.

15.

Eight red rectangles, each containing a minus sign (-), are arranged in two rows of four. To the right of these is an equals sign (=), followed by two green rectangles, each containing a plus sign (+), stacked vertically.

Find the value of x.

16.

Two red rectangles, each containing a minus sign (-), are on the left. To the right is an equals sign (=), followed by a green rectangle with a plus sign (+) at the top, and three red rectangles, each containing a minus sign (-), stacked vertically below it.
