Translate Algebraic Expressions

1) Five-sixths of b is subtracted from 4

2) b cubed minus the product of 6 and c plus 9

3) Add 8 to 2 times r

4) Add four-fifths to 5 times q

5) 6 less than z

6) z divided by 5

7) 4 is added to h

8) q is added to 2

9) Subtract five-sixths from 6 times r

10) The product of s and 8 is subtracted from three-fourths of p

Translate Algebraic Expressions

1) Five-sixths of b is subtracted from 4

$$\underline{4 - \frac{5}{6}b}$$

2) b cubed minus the product of 6 and c plus 9

$$\underline{b^3 - 6c + 9}$$

3) Add 8 to 2 times r

$$\underline{2r + 8}$$

4) Add four-fifths to 5 times q

$$\underline{5q + \frac{4}{5}}$$

5) 6 less than z

$$\underline{z-6}$$

6) z divided by 5

$$\underline{z/5}$$

7) 4 is added to h

$$\underline{4+h}$$

8) q is added to 2

$$\underline{q+2}$$

9) Subtract five-sixths from 6 times r

$$\underline{6r - \frac{5}{6}}$$

10) The product of s and 8 is subtracted from three-fourths of p

$$\underline{\frac{3}{4}p - 8s}$$
